

Vale Consulting Services

Desk Reviews

Vale Consulting Services can assist you in analyzing and controlling variance on property claims.

Vale Consulting Services helps carriers control the rise in average indemnity through two valuable cost containment programs:

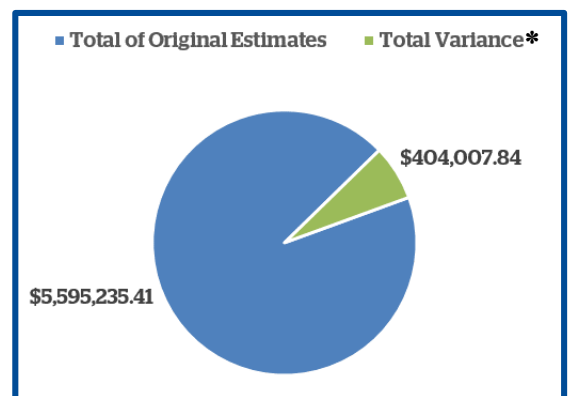

Closed File Review - Quantifying claims variance, identifying root cause and recommending best practices to curtail future loss.

Open File Review - A time-sensitive QA review with line item commentary and recommendations shared with the client's adjuster. Vale commits to a two business day turn around on all files.

Average Elapsed Time for Vale Reviewer Audit on Open Files*

For every \$1 spent on a Vale file review, over \$13 of variance was identified.

- Vale file reviewers average over 25 years of claims experience
- Customized client reports:
 - Root Cause Analysis Report
 - IA Report Card
 - Vale Peer Group Comparison
- Average claim value variance was found to be 7.22%*

**Data based on approximately 250 recent estimate reviews in 2018*
